From the Director:

**Learning**
We are off to Kindergym tomorrow with the R/1 class. This is a great opportunity for the kindy children to extend their skills with help from the older children while also providing quality time for the 4 –6 year olds to share time together.

As part of our numeracy program the children have been learning about data. They have been recording the type of fruit they have eaten and then looking at the totals of fruit for the day. We then discussed which fruit was the most popular.

**Reconciliation event**
We have activities planned for the entire day with our lead event being the recording of a song in Narungga language with help from Andrew Oakes. Our Special Quest is Sonja Rankin the DECD Aboriginal Cultural Consultant who will be assisting the children and staff with correct pronunciation in preparation for our recording session.

**Philosophy Statement**
Our centre’s philosophy statement is due for review. The statement bundles together and defines our guiding principles and core beliefs. “Our Big Picture”. Your input would be greatly appreciated.

**RURAL CARE VACANCY**
We have two vacancies available. Please see centre staff to secure these places.

**Tissues**
We have only received 3 boxes.

**Family involvement**
Please complete survey and return ASAP.

Regards Vicki

**More News**

**Sustainability Action Plan**
The children have been fantastic in making an effort to reduce the use of paper towel. Children are now taking the data themselves on the use of paper towel. We are due to review our Sustainability Purpose statement. I have attached a copy.

**JUST A THOUGHT !** You do know that you are welcome to hang around and have a chat or coffee particularly in the morning at drop off time. This is great time to have a deeper conversation about your child’s learning and their progress.
